

## Air Motor, an alternative to electric motors

Motors that operate by compressed air up to 10 bars with infinitely variable powers, speeds and torques, perfect for a wide range of industrial applications. Consider these advantages.

- No spark or heat (ATEX), operates safely in wet/corrosive/hazardous environment
- Power/Weight ratio 5 to 6 times higher than electric motor
- No peak current when starting
- Automatic torque adjustment
- Variable speed control

### Air treatment accessories

All air tools need lubrication and filtration

**Pneumatic Expert**

VAYU  
PNEUMATICS

## Pneumatic transport system (PTS)

Fast and reliable solution to transport of sample containing carriers.

- Metal samples
- Powder and granular samples
- Irradiate samples
- Hospital samples
